Mr. McCauley reported that the Township is in receipt of Moody’s Investment Service Annual Comment on Bristol Township as of December 2016. Once again it is an excellent report.

The report reads that, “The credit position for Bristol Township is very healthy, and its Aa3 rating is on par with the median rating Aa3 for cities nationwide. The notable credit factors include a robust financial position and a moderate pension burden with a low debt liability. It also reflects a healthy socioeconomic profile and tax base.

The financial position of the township is very strong and is favorable with respect to the assigned rating of Aa3. The available fund balance as a percent of operating revenues (71.4%) far surpasses the US median and saw an impressive increase between 2015 and 2012. Furthermore, the net cash balance as a percent of revenues (64.3%) is far superior to other Moody’s-rated cities nationwide.

The township has a moderate debt liability to its Aa3 rating. The net direct debt to full value (1.2%) is slightly below the US median.

The ability to generate positive operating margins indicates strong financial management. Advantageously, on average, Bristol Township’s operations were positive and concurrently, the tax base grew.”
